-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 September 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the deflecting means and the cam means must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 recites the limitation "said 1 guard" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,204,807 to Ramsing.

Regarding claim 1, Ramsing discloses a wall mounted deflector for light switches having a deflecting means (16), located a distance away from the wall greater than the length of the switch (15) which is being protected.

Regarding claim 2, Ramsing discloses the deflecting means as being arcuate (see arc between side 17 and middle 16) extending from the wall to protect the device (15).

Regarding claim 3, Ramsing discloses the body (16) as having a width greater than that of the device (15).

Art Unit: 3635

Regarding claim 4, Ramsing discloses the arcuate body as having a height (between top 20 and bottom 18) greater than the height of the device (15).

Regarding claim 5, Ramsing discloses a fastener as a connecting means (11) for attaching the guard to the wall in a vertical alignment (fig. 1: see vertical displacement of fasteners 11).

Regarding claim 6, Ramsing discloses first and second members (fig. 2: 17 and opposite side) which are in horizontal alignment with the device (15).

Regarding claim 7, Ramsing discloses a wall mounted guard for protecting a switch fixture (15) having a cam means (figs. 4 & 5: 22) adjacent to the fixture (15) which has a deflecting means (16) for deflecting objects away.

Regarding claims 8 and 9, Ramsing discloses a means for attaching the wall guard (11 & 171) in both a vertical alignment and horizontal alignment (fig. 1: see top & bottom and left & right sides evenly aligned to fixture 15) to the fixture.

Regarding claim 10, Ramsing discloses a pair of cam members (21 & 22) in horizontal alignment (fig. 6).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The cited patents listed on the included form PTO-892 further show the state of the art with respect to wall mounted protectors in general.
